## About Us

K & D Tool & Die, Inc. is a versatile tool and die shop with an experienced staff to assist you in your production and design needs. We have a wide range of equipment, programming and design knowledge to provide high quality tooling and production parts. We engineer and build secondary operation tooling and assembly tables for specific use. Our machinists work with a large selection of material that includes steel alloys, stainless steel, aluminum, copper, nickel alloys and plastics to ensure the completion of a variety of jobs, large and small.

*"We want to ensure our customer's satisfaction with quality products, designs, and prototypes to meet and exceed their specified requirements. We welcome your business."*

## Services We Provide
